

**Celebrate Engineering
Ingenuity Day
Sunday February 23, 2025**

CEI Day is an annual event sponsored by Richmond Joint Engineers Council (RJEC) and is geared to middle and high school students showcasing engineering where students learn more about careers and educational opportunities available to them in the field of science and engineering. There are two competitions for middle school and high school students, Egg Drop or Popsicle Stick Bridge. This is an open format event with several engineering and technical societies and clubs and engineering education groups having booths set up with information to share and answer any questions student, parents or educators might have about engineering. This event is open to anyone in the community and is a free event to attend.
